Continuation of Substance of Interview including description of the general nature of what was discussed: Discussed proposed examiner's amendment to claims 5 and 13. Examiner recommended amendments to these claims to match the allowable subject matter recited in claim 18 (ticket generation time). Examiner noted that the specification seemed to indicate the the ticket generation time was not the time in which the second access node received the tickets, but rather the time which the first access node generated or provided the ticket (see page 12, paragraph 35 of the specification). Applicant respectfully agreed to allow examiner to amend claims to recite this interpretation of the ticket generation time.
